

The information kept inside *Data Link* could
SAVE YOUR LIFE

- >> It can help the Emergency Services in a crisis
- >> It details what medication you are allergic to
- >> It says what your blood group is
- >> It stores details of your current medication
- >> It can give information on your doctor and carers and more
- >> And can save valuable minutes by always being available and always being in the same place
- >> It can talk for you if you are unable to
- >> Data Link is stored in the fridge
- >> Did you know that a fridge rarely gets destroyed in a fire? That's why it's stored there

How does the Scheme work?

Your details are stored in a clearly labeled plastic container (pictured on this page), which is kept in your fridge. Two matching labels, known to the Emergency Services and other care agencies are displayed in your house, one on the outside of your fridge door and the other on the inside of your front door (so it is not visible from the outside).

**Data Link Pots are available FREE
